EDUCATION

University of Wisconsin - Green Bay

Green Bay, Wisconsin

Bachelor of Science Degree, GPA: 3.82/4.00, Rising Senior

Expected May 2027

- Major in Computer Science (Emphasis in Artificial Intelligence)

SKILLS

- **Programming Languages:** Python, SQL, R, Java, HTML, CSS, JavaScript, Dart
- **Frameworks/Tools:** Angular, Flask, React, Flutter, Node.js, TailwindCSS, Firebase, Docker, Material Design
- **Core Concepts:** OOP, Web Services, RESTful APIs, Data Structures & Algorithms, Multi-threading, CI/CD
- **Soft Skills:** Critical Thinking, Project Management, Communication, Problem Solving, Team Collaboration

EXPERIENCE

Faith Technologies Incorporated

Appleton, WI

Data Engineering Intern

June. 2026 – Present

- Engineered and optimized data pipelines within Google Cloud Platform (GCP) using SQL and Python to support parametric estimation projects. Executed comprehensive data quality assessments and conducted Margin and Excellerate Labor analyses, regularly synthesizing and presenting actionable technical insights to key stakeholders.
- Designed interface mockups for a Data & Analytics KPI Dashboard using Figma and contributed to the development of enterprise AI solutions, including automated safety bots. Managed project workflows and coordinated cross-functional development efforts by strictly adhering to Agile/Scrum methodologies.

Alive & Kickin' Pizza Crust

Green Bay, WI

IT Intern

Jan. 2025 – Aug. 2025

- Redesigned vendor-facing web portals using React, Python/Flask, and Plotly to display real-time bulk ingredient inventory levels, improving supply chain visibility by 25% and reducing manual data entry errors.
- Developed Python automation scripts and AI agents to streamline IT Help Desk tasks, including email parsing, automated ticket logging, and smart responses to employee requests, reducing manual workload by 40%.
- Conducted regular on-site visits across multiple locations to ensure smooth system operations, troubleshoot technical issues, and maintain continuous workflow efficiency.

The College of Idaho

Caldwell, Idaho

IT Assistant

Jan. 2024 – May 2024

- Collaborated with IT security specialists to identify and mitigate network vulnerabilities, implement anti-spam filtering rules, and improve endpoint security for 500+ users.
- Configured and maintained two-factor authentication for faculty and student email accounts, troubleshooting login issues, password resets, and application access to ensure reliable system availability.

RESEARCH & PROJECTS

FedHemo: Privacy-Preserving Hemoglobin Prediction | CTAB-GAN+ Framework

- Architected a privacy-preserving synthetic data pipeline using a Federated CTAB-GAN+ framework to generate high-fidelity, demographically balanced clinical data, effectively reducing distributional divergence by 55% without exposing raw patient records..
- Benchmarked advanced gradient-boosted machine learning models (XGBoost, CatBoost) to optimize predictive accuracy, and engineered a comprehensive SHAP-driven visual analytics dashboard to audit algorithmic fairness and feature importance.

XChange – AI-Powered Social Finance Platform | React, WebSockets, Grok API, X API

- Built an AI-driven social finance platform that transforms real-time market chatter into actionable sentiment insights by integrating Grok AI, X/Twitter APIs, and a scalable WebSocket-powered React frontend.
- Developed a robust paper-trading backend with portfolio tracking, order execution logic, and secure data storage, ensuring reliable performance and clean API communication across all system components.

Connect Well Nepal | Flutter, Dart, Firebase, Material Design

- Developing a cross-platform telehealth application (Android & Web) to bridge healthcare gaps in Nepal by connecting patients with providers via video, voice, and chat.
- Implemented a modern UI using Material Design, featuring secure authentication, appointment booking skeleton, and a comprehensive health resource hub.
- Architected a scalable codebase with Flutter and Firebase to handle real-time data, user profiles, and future video consultation integration (Agora/Jitsi).

PLC Monitoring System | Python, Flask, HTML, CSS, JavaScript

- Built and deployed a Flask web application for real-time PLC monitoring, integrating ControlLogix & SLC500 systems via pylogix/pycomm3, enabling data collection with 99.9% accuracy.
- Designed a multi-threaded Python backend with interactive data visualization, reducing equipment downtime analysis time by 40% and empowering vendors and plant operators with faster, data-driven decision-making.

SecAPI | Python, Azure OpenAI

- Built "SecAPI," a secure Python-based CLI tool for encrypting and managing API keys locally, using AES encryption and a custom vault system to support automated, secret-free deployments.
- Integrated an AI agent powered by Azure OpenAI, enabling natural language interaction with the secure vault, allowing users to query and manage credentials using natural language.

LEADERSHIP AND AFFILIATION

Uunchai Summer Cohort 2026

Remote

Project Mentor | Direct-to-Retail Agricultural Marketplace

June 2026 – Present

- Directed a 6-week Agile mentorship program, leading a 6-member team to engineer a Progressive Web Application (PWA) that mitigates agricultural supply chain inefficiencies in Nepal.
- Architected a resilient Node.js and PostgreSQL backend featuring offline data synchronization via IndexedDB and secured digital payments through an eSewa HMAC-SHA256 cryptographic handshake.

Google Developer Groups (GDG) on Campus - UWGB

Green Bay, WI

Founder & President

Nov. 2025 – Present

- Founded the first GDG chapter at UWGB by drafting the governing constitution, securing official university approval, and directing a core executive board to lead campus-wide technology programs.
- Directed the planning of technical workshops and major campus events, including spearheading the upcoming HackGB hackathon, and represented the university at the Google I/O and North America GDG Summit to connect students with industry-standard AI and cloud computing practices.

College of Idaho Coding Club

Caldwell, ID

Vice President

Dec. 2023 – May 2024

- Organized Coding Treasure Hunt, Web Development workshops, and Resume Workshops for the student body, helping peers solve complex technical problems and build practical website building skills.
- Hosted weekly coding nights to solve challenging programming questions, helping students prepare for technical interviews and enhancing their problem-solving abilities.

Nepalese Students' Association (NSA)

Caldwell, ID

Founder & Vice-President

Oct. 2023 – May 2024

- Founded the association and organized major cultural events (Dashain, Tihar, Nowruz), managing promotion across social media platforms to increase community engagement.
- Managed the club's social media presence, designing posters and banners to effectively promote events and activities.

AWARDS

- **Sherry Anklam Memorial Award (2026):** Awarded a \$1,000 grant from the NEW AITP SAMA Committee for outstanding coursework and leadership.
- **HackPrinceton Winner (2024):** Won 2nd Place for Most Impactful Use of X API (Top 12 out of 194 projects).
- **I-Fit Challenge (2022):** Winner, secured \$500 Grant at Iowa State University (Best 6 among 72 teams).
- **National Young Scientists' Summit (2021):** 1st Runner-up in Environmental Science Category.
- **Dean's List:** Achieved High Honors across 5 consecutive semesters at UW-Green Bay and The College of Idaho.
- **Campus Service Award (2024):** Recognized for dedicated service and IT support at The College of Idaho.
- **Academic Excellence:** Recipient of Dr. Prakash Dev Award and Laxmi Award for achieving 4.0/4.0 GPA in National Secondary Education Examinations.
